

December 2020

BioXtreme is happy to announce a new addition to its management team - Mrs. Tamar Moyal. Tamar will serve as the company's Sales Manager and will be in charge of establishing sales operations in North America and Europe, including business development, contact with distributors, KOL's, developing training materials and more.

Tamar has more than 30 years of experience in sales management, business development, clinical training and training development particularly in the medical devices field. She has extensive experience with working with start-up companies of all stages, including close work with distributors and all educational activities. During her 30 years of experience Tamar has developed extensive knowledge of the Israeli technological ecosystem and a wide network spreading all over US, Europe, China, APAC and more.

Tamar hold a BSc in Electronical Engineering from the Technion, Israel.

We're positive that Tamar joining the team will help elevate the company, bring it to the next level, and introduce deXtreme and our ground breaking Error Enhancement technology worldwide.

### **About BioXtreme**

BioXtreme Rehabilitation Robotics is instilling new dexterity for stroke and other neuro injuries patients. Using a patent-protected groundbreaking Error Enhancement technology, BioXtreme has developed a robotic system that helps with upper limb motoric rehabilitation. Our product, deXtreme™ preforms automatic rebuild of motion range and capability through adaptive/intuitive learning. Based on unique robotic system that applies Error Enforcement forces, BioXtreme technology helps reprogramming the mind for extreme performance.
